Professional Summary

Experienced Technical Lead and Backend Engineer with 6+ years of expertise in designing scalable, resilient, and high-load distributed systems using Java, Kotlin, and the Spring ecosystem.

Strong background in microservices architecture, event-driven systems, system integration, and backend platform modernization within the banking and fintech domain. Proven ability to lead engineering teams, mentor developers, drive architectural decisions, and improve engineering processes.

Passionate about building reliable systems, improving software quality, and solving complex technical challenges. Continuously focused on learning modern technologies, concurrency models, distributed systems, and scalable architecture patterns.

Core Competencies

Backend & Architecture

- Java (8–21)
- Kotlin
- Spring Boot / Spring Ecosystem
- Microservices Architecture
- Distributed Systems
- Event-Driven Architecture
- System Design
- High-Load Systems
- REST APIs
- Integration Architecture

Infrastructure & DevOps

- Docker
- Kubernetes / Rancher
- GitLab CI/CD
- Infrastructure Automation

Databases & Messaging

- PostgreSQL
- RabbitMQ
- Redis
- SQL Optimization

Leadership

- Technical Leadership
- Team Mentoring
- Code Reviews
- Architecture Decision-Making
- Cross-Team Collaboration
- Engineering Best Practices

Professional Experience

Alatau City Bank

Technical Leader

January 2025 – Present | Almaty, Kazakhstan

Leading backend engineering initiatives and driving the transformation from monolithic architecture to scalable microservices.

Key Achievements & Responsibilities

- Led the design and implementation of scalable microservices using Kotlin and Java.
- Defined architectural standards, service boundaries, and communication patterns.
- Designed and improved integrations with third-party systems.
- Improved reliability, scalability, and maintainability of backend services.
- Mentored developers, conducted code reviews, and promoted engineering best practices.
- Collaborated closely with product and cross-functional teams to align technical solutions with business goals.
- Participated in architectural planning for distributed and event-driven systems.

Technologies

Kotlin, Java, Spring Boot, PostgreSQL, RabbitMQ, Microservices, Distributed Systems

Jusan Bank

Senior Java Developer

July 2022 – December 2024 | Almaty, Kazakhstan

Worked on backend platform modernization, microservices development, and integration of external systems within the banking ecosystem.

Key Achievements & Responsibilities

- Developed microservices for core banking platforms using Java and Kotlin.
- Integrated third-party systems with focus on reliability and maintainability.
- Participated in gradual monolith decomposition into distributed services.
- Improved system reliability and contributed to infrastructure automation.
- Collaborated with multiple engineering teams to deliver scalable backend solutions.

Technologies

Java, Kotlin, Spring Boot, PostgreSQL, RabbitMQ, Docker, Microservices

Alfa-Bank Kazakhstan

Senior Java Developer

December 2021 – June 2022 | Almaty, Kazakhstan

Key Achievements & Responsibilities

- Integrated external services into banking infrastructure.
- Developed reusable backend microservices.
- Participated in infrastructure automation initiatives.
- Contributed to backend reliability and scalability improvements.

Technologies

Java 11, Spring Boot, Golang, PostgreSQL, RabbitMQ, Docker, GitLab, Kubernetes, Rancher

Java Backend Developer

October 2020 – December 2021 | Almaty, Kazakhstan

Key Achievements & Responsibilities

- Developed backend services for banking infrastructure.
- Participated in CI/CD process improvements and deployment automation.
- Worked with scheduled and background processing systems.

Technologies

Java, Spring Boot, Quarkus, PostgreSQL, Docker, GitLab, Kubernetes, Rancher

ICORE-Integration LLP

Software Developer

June 2019 – September 2020 | Almaty, Kazakhstan

Key Achievements & Responsibilities

- Developed enterprise software solutions for industrial companies and banks.
- Built backend services and integrations using Java and Spring.

Technologies

Java, Spring Framework, PostgreSQL

Altyn Bank

Information Systems Support Manager

August 2018 – June 2019 | Almaty, Kazakhstan

- Supported and maintained banking information systems.
 - Participated in operational monitoring and issue resolution.
-

Education

Almaty University of Power Engineering and Telecommunications, Kazakhstan

Bachelor's Degree — Radio Engineering & Electronics

2013 – 2017

Moscow Power Engineering Institute, Russia

Bachelor's Degree — Economics

2014 – 2017

Kazakh Academy of Transport and Communications (KazATC), Kazakhstan

Master's degree — Computer science and software

2013 – 2017

Languages

- English — Professional Working Proficiency
 - Russian — Native / Bilingual
 - Kazakh — Native / Bilingual
-

Additional Information

- 6+ years of commercial backend development experience.
- Strong banking and fintech domain expertise.
- Experience with high-load and mission-critical systems.
- Strong understanding of concurrency, distributed systems, and scalable backend architecture.
- Passionate about technical leadership, mentoring, and continuous improvement.
